

MATERIAL SAFETY DATA SHEET

Date Prepared October 09, 2008

Identification

Product Name: **Leather Floating Floors**

Supplier Name: TORLYS Inc., 1900 Derry Road East, Mississauga, Ontario
L5S 1Y6
Ph: 800 461-2573
Fx: 800 461-5220

Composition/ Data on Components

Definition:

Panels or tiles for loose laid installation, consisting of a compact high density fibreboard layer, a bonded surface layer of recycled leather and a back layer of soft agglomerated cork. The core material (substrate) is tongued and grooved with a special profile design (GFIX - UNICLIC[®]) to allow the panels to be assembled together mechanically, without the use of glue.

Dangerous components: None

Hazards Identification

Hazard designation: None for product as sold.

Solid material, manual or mechanical cutting can result in the generation of wood and cork dust.

Wood and cork dust can cause nasal dryness, irritation and obstruction.

Leather floating floors have extremely low concentration of volatile compounds. HDF boards are of the lowest class (E1) of Formaldehyde content.

First- Aid Measures

General information: No special measures required.

Inhalation:

No hazards for product as sold. Operations such as milling, cutting, sanding, etc., may produce dust that may be irritating. Remove to fresh air. Get medical advice if persistent irritation or breathing difficulty occurs.

Skin Contact:

Solid panels may be abrasive to, or cut skin. Operations such as milling, cutting, sanding, etc., may produce dust or fines that may be irritating. Wash with soap and water. If irritation persists, seek medical attention.

Eye Contact:

No hazards for product as sold. Operations such as milling, cutting, sanding, etc., may produce dust that may be irritating. Rinse eyes with fresh water. If irritation persists, seek medical attention.

Ingestion:

Not an expected route of entry with normal use of product.

Fire behavior

Leather floating floors do not present any special risk and are not explosion hazard products. Sanding, sawing or machining can result in the generation of wood and cork dust that can present an explosion hazard if a dust cloud contacts an ignition source.

Flash Point: N/A

Suitable extinguishing agents:

Use extinguishing media appropriate for surrounding fire. Extinguishing powder, sprayed water or foam can be used.

Protective equipment:

Protective clothing and self-contained breathing apparatus may be required.

Products of combustion:

Hazardous decomposition products include carbon oxides (CO and CO₂).

Accidental Release Measures

Person-related safety precautions: Not required.

Measures for environmental protection: Not required.

Measures for cleaning/collecting:

Dust generated from sawing, sanding, drilling, or routing of products may be vacuumed for recovery or disposal. Avoid dusty conditions and provide good ventilation.

Additional information: No dangerous materials are released.

Handling and Storage

Information for safe handling:

No special measures required. Follow normal good hygiene practices. Protect exposed areas from cuts and abrasion. Wear safety glasses when machining the product. Other protective equipment such as gloves or respirators may be needed depending on dust conditions.

Information about protection against explosions and fires: Sanding, sawing or machining can result in the generation of dust that can present an explosion hazard if a dust cloud contacts an ignition source.

Requirements for storage rooms: Storage area has to be indoor, well ventilated and damp free.

Further information about storage conditions: To prevent microbiological growing (mould), it is recommendable that air humidity of the warehouse be kept under 60%.

Exposure Controls/ Personal Protection

Ventilation:

No special ventilation requirements for product as sold. Provide adequate ventilation to meet exposure guideline if operations generate dust or chips.

Due to the explosive potential of wood dust when suspended in air, precautions should be taken to prevent sparks or other ignition sources in ventilation equipment.

Personal Protection:

General protective and hygienic measures: There is no special risk to health in handling this product. Wear protective equipment such as gloves or respirators when machining the product.

Breathing equipment: Not required. Dust mask when machining the product.

Protection of hands: Cloth, canvas, or leather gloves are recommended to minimize potential mechanical irritation slivers from handling and machining product.

Eye protection: Not applicable for product in purchased form. Goggles or safety glasses are recommended when machining the product.

Work/Hygiene Practices:

Follow good hygienic and housekeeping practices. Clean up areas where wood dust settles to avoid excessive accumulation of this combustible material. Minimize practices that generate high airborne-dust concentrations.

Exposure Guidelines:

Limits Wood Fibre Dust

Occupational Safety and Health Administration (OSHA) [Permissible Exposure Limits \(PEL\)](#):

5 mg/m³ respirable; 15 mg/m³ Total – 8 hour time weighted average (TWA).

Physical and Chemical Properties

Form: Solid, in panels or tiles.

Colour: According to product reference.

Smell: Odourless/leather/wood.

Boiling point: N/A

Freezing/Melting point: N/A

Vapour Pressure: N/A

Vapour Density: N/A

Self-flammability: Product is not self-igniting.

Danger of explosion: Product is not explosive.

Density at 20°C: 750 - 800 Kg/m³.

Solubility in / Miscibility with Water: Not miscible.

Viscosity: N/A

pH: N/A

Stability and Reactivity

Stability: The product is stable when used as intended.

Materials to avoid (incompatibility): None.

Conditions to avoid: Avoid exposure to open flame.

Hazardous Decomposition products: No decomposition if used according to specifications.

Thermal decomposition products include carbon oxides (CO and CO₂).

Hazardous Polymerization: Will not occur.

Toxicological Information

Toxicity to Animals: N/A. This product is not expected to be toxic to animals.

Toxicity to Humans: N/A. This product is not expected to be toxic to humans.

Sensitization: No sensitizing effect known.

Additional toxicological information: When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

Ecological Information

General notes: If correctly used, no environmentally harmful effects are to be expected.

Degradability: 100%.

Mobility: N/A.

Ecotoxicity: N/A. Not expected to be ecotoxic.

Toxicity of the Products of Biodegradation: N/A.

Disposal Considerations

Product Recommendation: Disposal according to local legislation. If possible, recycle the product. It may be land filled or incinerated under adherence to the official regulations.

Packaging Recommendation: Recycle. Disposal must be made according to official regulations.

Transport Information

Product is not qualified as dangerous.

Not regulated as a hazardous material by the U.S. Department of Transportation.

Not listed as a hazardous material in Canadian Transportation of Dangerous Goods (TDG) regulations.

Land transport ADR/RID-GGVS/E Class: N/A

Maritime transport IMDG/GGVSea Class: N/A

Marine pollutant: No

Air transport ICAO-TI/IATA-DGR Class: N/A

Regulatory Information

Observe the normal safety regulations when handling.

Classification: N/A

Hazards labels: N/A

R-phrases: N/A

S-phrases: N/A

Other Information

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.
